

What's Included in the Bundle?

Bitdefender Endpoint Detection Response ("EDR")

Endpoint Detection and Response (EDR), also referred to as endpoint detection and threat response (EDTR), is an endpoint security solution that continuously monitors end-user devices to detect and respond to cyber threats like ransomware and malware.

Bitdefender's best-of-breed EDR solution provides clear visibility into indicators of compromise (IOCs) and one-click threat investigation and incident response workflows. Delivers managed detection and response services to organizations that are highly sensitive about their data security.

Bitdefender GravityZone Email Security

Protects any cloud or on-premises email system from spam, phishing, malware as well as sophisticated or targeted attacks. Prevents ransomware, impersonation and fraud attempts. It leverages multiple leading security engines and behavioral technologies to analyze incoming and outgoing email content, URLs, or attachments.

Remote Device Monitoring & Management ("RMM")

Our RMM client provides a variety of capabilities to ensure your device's uptime is maximized. Capabilities include security and compliance audits, attended and unattended remote support by our team and ticketing system integration to ensure nothing "falls through the cracks".

Virtual Private Network Client (optional)

Our VPN client is an extremely simple yet fast and modern VPN that utilizes **state-of-the-art** cryptography. It aims to be faster, simpler, leaner, and more useful than others. It is a general purpose VPN fit for many different circumstances. It has cross-platform capability (Windows, macOS, BSD, iOS, Android) and widely deployable. It is regarded as the most secure, easiest to use VPN.

User Support

Rely on our technical team via email for issues, questions or needs regarding the tools in this bundle during business hours Monday through Friday.
